ARCO

White Carrara marble base. Satin stainless steel telescopic stem. A rotatable and height-adjustable aluminum reflector that is pressed, polished, and coated with nitrocellulose. "We were thinking of a light that would illuminate the table. They already exist, but you have to get around them. In order to leave enough space around the table, the base must be at least two meters away. That's where Arco's idea comes in."

LOHJA

This iconic Cameron Design House pendant light is inspired by the tranquil lakes of Lohja, Finland. This contemporary design won The International Design and Architecture Award for best Pendant/Chandelier. Exploring tranquillity, space and equilibrium, the Lohja combines simplicity with geometry creating a striking, balanced sculptural form which changes appearance from each angle.
Bespoke options and design service available.

Like water droplets, no two Mizu are alike, each crystal shape is unique and made meticulously by hand. Using only the clearest crystal (24% lead), Mizu perfectly emulates water's refraction of light, casting amazing patterns around the room, reminiscent of flowing water.
