

Standard Track

TZ315	Length:1.5M	
TZ320	Length:2M	
TZ330	Length:3M	

AD-304 Straight connector

AD-301L Live-end Left

AD-301R Live-end Right

AD-305 End cap

AD-302L L connector Left

AD-302R L connector Right

AD-63 Straight connector

AD-303L T connector Left

AD-303R T connector Right

SINGLE CIRCUIT TRACK

HT single circuit track system design for indoor luminaries, the system could be composed to a excessive orientation with different jointer, and the lighting fixtures should come with a specify compatible connector that connector that connect to the track. And the fixture position are adjustable for where the illumination is need, it is the excellent illuminative plan for various exhibit hall ,showroom,shop window where the lighting display is need.

HT track work with main voltage 220V max 16A, pre cut in different length, complete with the different functional connector (polarity), the track could last to various directions for illumination necessary.
